

There are two rounds to get through the process one is Technical and other one is HR.
In technical round they asked me number of questions not completely technical.
First question was as usual "tell me something about yourself" and then the interviewer asked me few questions related to my introduction only.
Second question was the preferable language i said java and c.
He gave me question to WAP to solve $(\sqrt[n]{x})^{1/n}$ and after that normal basic questions of language.
And then there were two puzzles.
And lastly ECE related questions.
After that i had my HR round where they ask me to explain my curricular activities and that was it!
